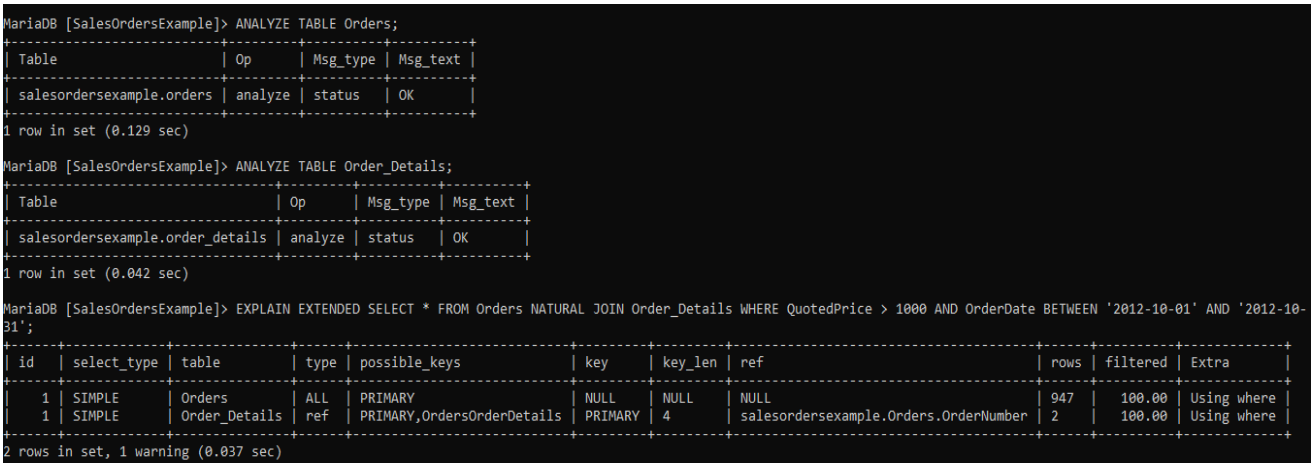
Here is the result after running Analyze command:



```
MariaDB [SalesOrdersExample]> ANALYZE TABLE Orders;
+---------------------------+---------+----------+----------+
| Table                     | Op      | Msg_type | Msg_text |
+---------------------------+---------+----------+----------+
| salesordersexample.orders | analyze | status   | OK       |
+---------------------------+---------+----------+----------+
1 row in set (0.129 sec)

MariaDB [SalesOrdersExample]> ANALYZE TABLE Order_Details;
+---------------------------------+---------+----------+----------+
| Table                           | Op      | Msg_type | Msg_text |
+---------------------------------+---------+----------+----------+
| salesordersexample.order_details | analyze | status   | OK       |
+---------------------------------+---------+----------+----------+
1 row in set (0.042 sec)

MariaDB [SalesOrdersExample]> EXPLAIN EXTENDED SELECT * FROM Orders NATURAL JOIN Order_Details WHERE QuotedPrice > 1000 AND OrderDate BETWEEN '2012-10-01' AND '2012-10-
31';
+------+-------------+---------------+------+---------------------------+---------+---------+-----------------------------------+------+----------+-------------+
| id   | select_type | table         | type | possible_keys             | key     | key_len | ref                               | rows | filtered | Extra       |
+------+-------------+---------------+------+---------------------------+---------+---------+-----------------------------------+------+----------+-------------+
|    1 | SIMPLE      | Orders        | ALL  | PRIMARY                   | NULL    | NULL    | NULL                              | 947  |   100.00 | Using where |
|    1 | SIMPLE      | Order_Details | ref  | PRIMARY,OrdersOrderDetails | PRIMARY | 4       | salesordersexample.Orders.OrderNumber | 2    |   100.00 | Using where |
+------+-------------+---------------+------+---------------------------+---------+---------+-----------------------------------+------+----------+-------------+
2 rows in set, 1 warning (0.037 sec)
```

It is noticeable that after running analyze, the number of rows use for running command in Order table has increased by 3 (before that, the number is 944). This means that Analyze command is used by MySQL to analyze the data on tables (in this case, both Orders and Order_Details are examined), and through that, enhance its ability to search and perform the query.
